SHERRY DOWD, County Clerk
NAVARRO COUNTY, TEXAS
BY Michelle Perry DEPUTY

1. Definition of the problem
The problem is to determine the
value of the function $f(x)$ at the point $x = a$.

Let $f(x)$ be a function defined on the interval $[a, b]$.
We assume that $f(x)$ is continuous on $[a, b]$ and
differentiable on (a, b) . We want to find the
value of $f(a)$.

Let $f(x)$ be a function defined on the interval $[a, b]$.
We assume that $f(x)$ is continuous on $[a, b]$ and
differentiable on (a, b) .

We want to find the value of $f(a)$.

Let $f(x)$ be a function defined on the interval $[a, b]$.

We assume that $f(x)$ is continuous on $[a, b]$ and
differentiable on (a, b) .

We want to find the value of $f(a)$.

Let $f(x)$ be a function defined on the interval $[a, b]$.

We assume that $f(x)$ is continuous on $[a, b]$ and
differentiable on (a, b) .

We want to find the value of $f(a)$.

Let $f(x)$ be a function defined on the interval $[a, b]$.
