

# Navarro County County Road Culvert Replacement and Drainage Improvement Authorization

This document is submitted for review and authorization regarding roadway and drainage improvements on the roadway listed below.

**Road Name:** SE County Road 2135

### Project Cost Responsibility

The County shall be responsible for providing and paying for the culverts associated with this project.

Gary Ramsey, a Precinct 3 citizen, shall be responsible for paying all remaining costs associated with the project, including but not limited to rock, white limestone riprap, labor, equipment, hauling, and associated site work.

### Scope of Work

The project will consist of removing existing damaged and undersized culverts and installing three (3) new culverts to improve water flow, roadway stability, and long-term durability. The scope of work includes the following:

- Removal and disposal of existing culverts
- Installation of three (3) new culverts provided by The County and properly aligned and set to grade
- Backfilling around culverts with approved rock material to ensure proper compaction and support
- Establishing a solid base suitable for roadway traffic
- Widening the roadway back to its original width after culvert installation
- Installing 4-10 inch white limestone riprap on both sides of each culvert for erosion control
- Proceeding downstream to clean out the creek to improve water flow and reduce debris buildup

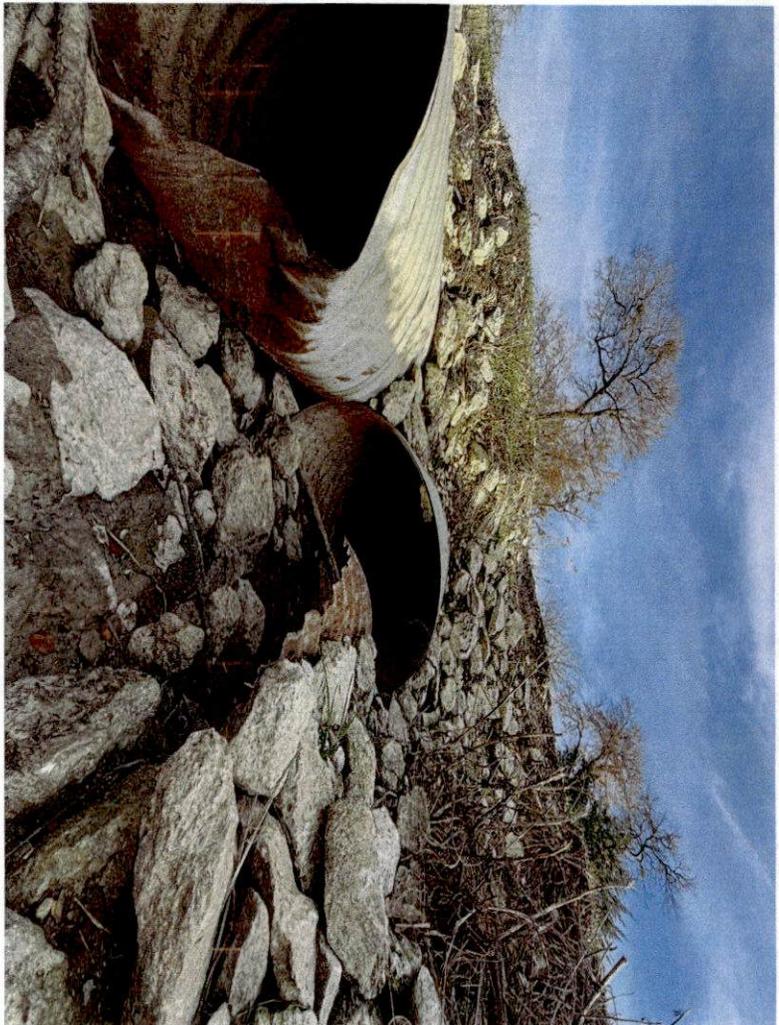

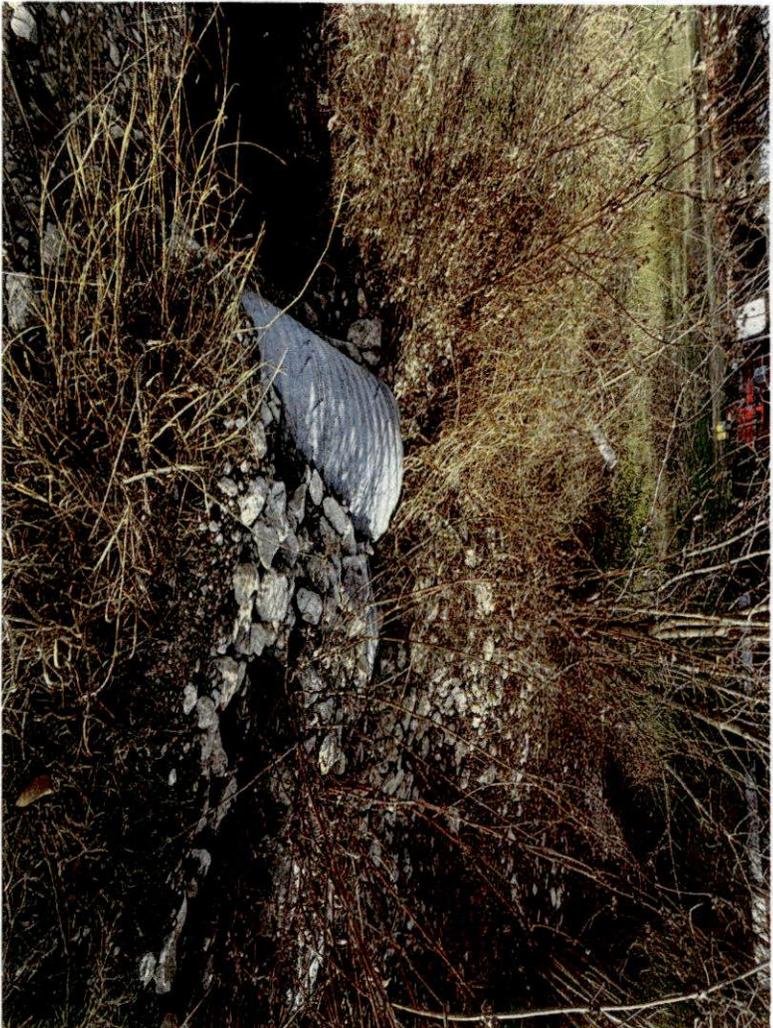

### Project Purpose

The purpose of this work is to restore proper drainage, prevent future washouts, and ensure the roadway remains safe and passable during periods of heavy rainfall. These improvements will reduce erosion, protect the roadway structure, and extend the service life of the crossing.

### Site Photos

The following photos document existing site conditions and areas included in the scope of work.

## Authorization & Signatures
