Key features

- SMPP based True SMS text messaging
- Our service transmits messages through various channels using standard protocols. Messaging services like email, voice calls, and SMS may experience delays or undelivered messages due to third parties, often chosen by you or the recipient (e.g., busy signal, carrier network issues, or dead battery). We cannot guarantee delivery and advise against relying solely on one messaging channel for important communications.
- Your plan includes unlimited push notifications via our app, email, or pager and a yearly allotment of “Message Credits” for other delivery channels that carry per-message or variable third-party costs (such as

SMS). Your Solution Quote lists your included Message Credits. You can monitor usage in the Client Portal. If you exceed your included Message Credits, overage charges may apply. You can purchase additional Message Credits to increase your yearly allotment at any time. Because delivery costs vary by different factors such as channel and destination, different messages may use credits at different rates. Message Credits are further described in the Messaging Credit Guide available in the Client Portal.
